Canada

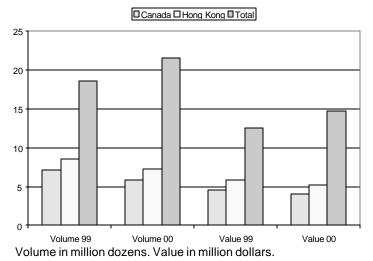

At the inception of the Canadian Egg Marketing Agency in 1972, only about 5 percent of Canada's egg supply was destined for the breaking industry. With rising demand by food processors, Canada's egg processing industry now absorbs 20 percent of total Canadian eggproduction.

The expansion of Canada's egg processing industry has resulted in sharply increased demand for processing eggs that is challenging the production and pricing structure of Canada's supply-managed egg industry. Exports of Canadian egg products are increasing (mostly to the U.S. and Japan) under a two-price system for eggs,but processors are turning to the United States to get additional quantities of eggs for breaking purposes. For 2000, the Department of Foreign Affairs and International Trade (DFAIT) reports that some processors had used all their import allocation by midyear. By mid August, 2000, the DFAIT had issued supplementary import permits for 2.8 million dozen breaking eggs from the United States. According to DFAIT, total imports of breaking eggs from the U.S. in the first seven months of 2000 reached 5.2 million dozen (3.3 million within access plus 1.9 million dozen supplementary). The WTO minimum access level for 2000 is 6.3 million.

The value of Canadian imports of live poultry and poultry meat in 1999 exceeded exports by US\$155 million, while the value of imports in the egg and egg product category exceeded exports by US\$10 million. Virtually all Canadian poultry and egg imports are from the United States.

Currency rate as of September 6, 2000, C\$1.00 equivalent to US\$.68. Source: USDA/Foreign Agricultural Service

Belgium-Luxembourg

The EU Commission mandated a beef tracking and labeling system that became effective in all EU countries on September 1, 2000. Belgium had already implemented it in June 1999. Now the Belgian Minister of Public Health, Magda Aelvoet, has initiated a pilot project called BELTRACE (Belgian traceability) that will extend traceability to other animal species as well. Still in its experimental phase, BELTRACE is operational in three slaughterhouses, one each for poultry, pork and beef, on a voluntary basis. It should be mandatory in all Belgian slaughterhouses by January 1, 2002.

BELTRACE is a computer data collection system created due to last year's dioxin crisis and other food safety traceability issues raised by consumer organizations over the past several years. Data are collected before and after slaughter and then sent and stored in a database which also includes data from the SANITEL (Belgian animal identification system), I.E.V. (Veterinary Inspection Institute) and I.V.B. (Interprofessional Belgian Meat).

<u>Japan</u>

The Ministry of Health and Welfare (MHW) recently announced that samples of poultry meat imported from Thailand contained vanomycinresistant enterococcus (VRE). The ministry detected the VRE during a JFY 1999 survey of imported and domestic samples of poultry and pork products. Two years ago VRE was detected in a small number of poultry meat samples from Thailand, France, and Brazil. In 1998, in response to MHW's request, Thailand and Brazil banned the use of the antibiotic drug AVP, reported to cause VRE. Based on the latest survey results, MHW has requested that the Thai government take strict measures to ensure AVP is not used and to conduct monitoring survey on poultry meat and products for export to Japan. Given the wide-spread food safety concerns in Japan this summer, the news may dampen poultry imports from Thailand. Thai poultry and broiler meat is extensively used in Japan's Hotel, Restaurant and Institional/ Home Meal Replacement (HRI/HMR) sector.

Cage Space Increased In Australia

The Australian Egg Industry Association has reached a tentative agreement with the government to increase cage space size by as much as 20 percent. A new minimum floor space of 550 square centimeters (85.25 square inches) per hen would apply to all new cages after January 1, 2001.

NATIONAL YOUNG TURKEY PARTS AND BULK MEAT

FROZEN (UNLESS SPECIFIED), CENTS PER LB., DELIVERED FIRST RECEIVERS, PART AND FULL TRUCKLOTS SEPTEMBER 14, 2000

Trading on fresh tom breast meat was at steady prices. The market tone was fully steady on thigh meat, tom drums and tom full cut wings and some sellers asked for higher trending prices on those items. Necks were slow to clear and weak. Fresh wing meat with skin on moved at 38-40 cents. A load of hearts traded at 15 cents. Export trading was fair on mechanically separated turkey and thigh meat

FRIDAY, SEPTEMBER 15, 2000
